Transfiere

Transfiere has established as the **main specialized R + D + i event in Southern Europe** to share scientific knowledge and promote innovation. It is the ideal place to learn about current trends to boost Spanish science and research at international level. The different strategic sectors of the economy find in Transfiere **business opportunities and innovative solutions** to their technological challenges.

Committee of Experts

Transfiere has different **working groups**, composed of professionals from the research and technology sector, who advise on the suitability of the contents included.

Scientific Programme

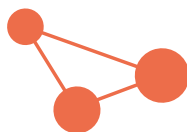

Transfiere is committed to the SDG through science, innovation and transfer of knowledge, providing solutions to the current technological challenges of society.

Why participate?

Networking

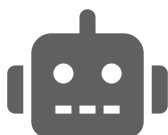

It is the essence of Transfiere as well as the creation of business opportunities and partnership. It has an online tool that allows participants to arrange an appointment schedule with potential partners: researchers, companies or representatives of the public administration

Exhibition Area

Companies and public administrations make know their products and services and more innovative projects

Demo Center - TRL7

Exhibition area to expose prototypes in order to give greater visibility to Spanish research from research groups, technology centers and private companies.

International Innovation Programme

Wide program of thematic panels and conferences where experts from different sectors speak about important topics of the international innovative agenda

Open Innovation Area

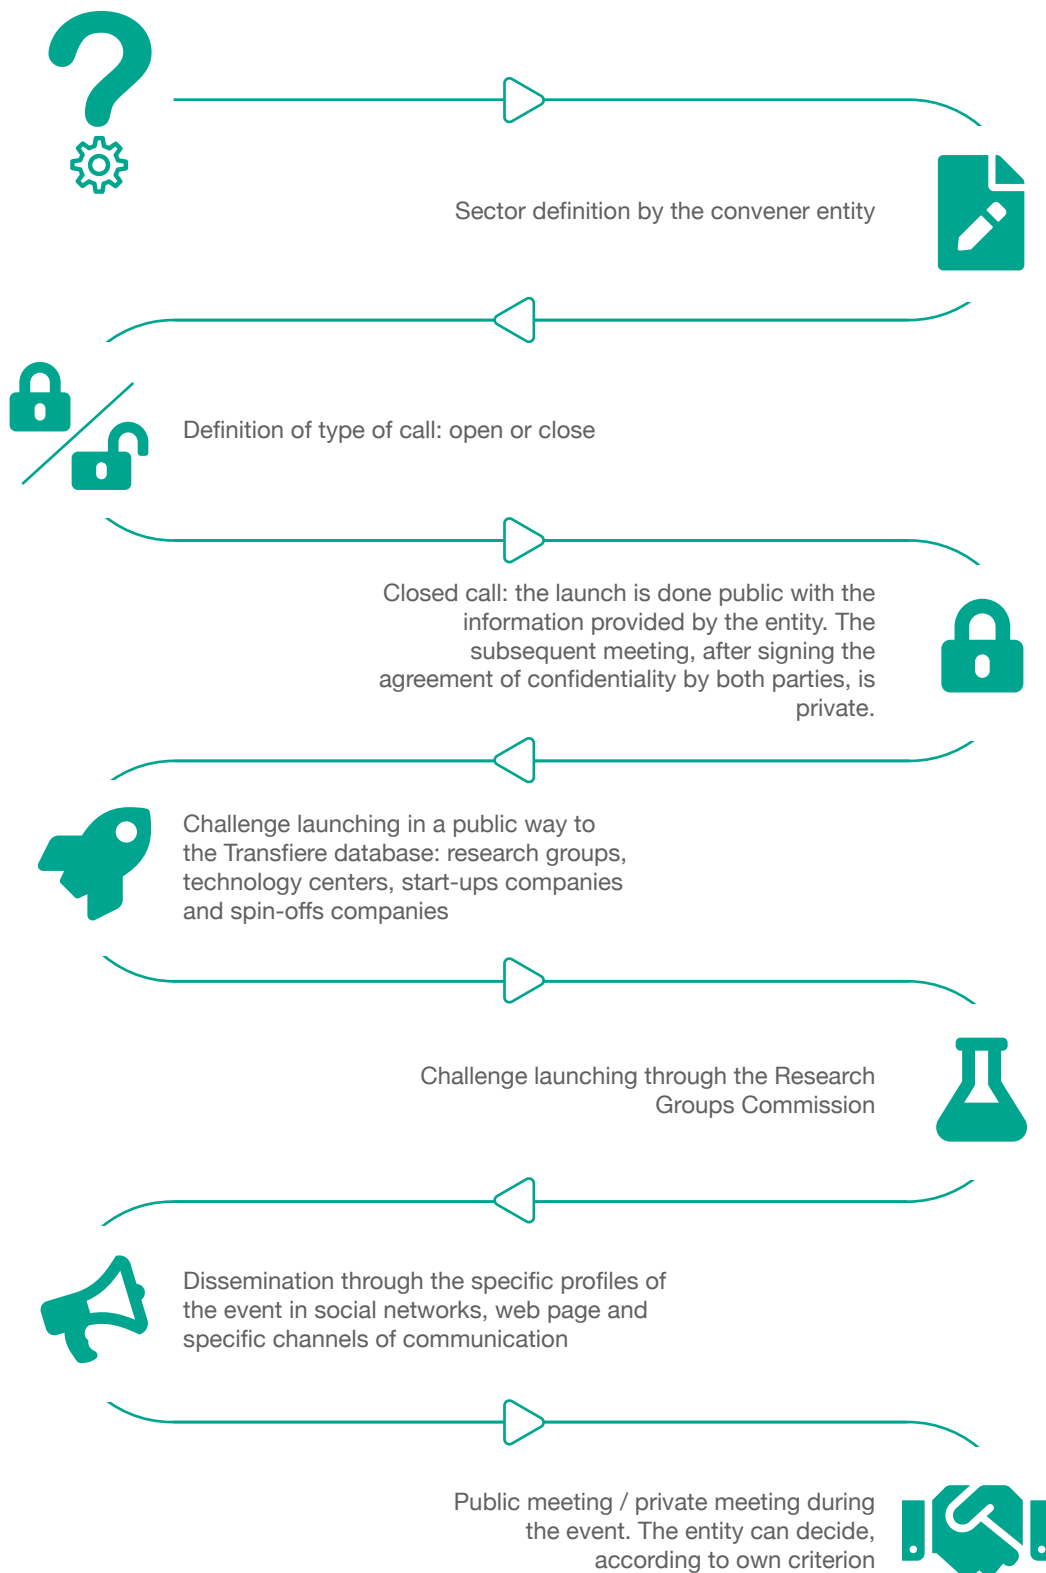

Specific area for start-ups companies, spin-offs companies and research groups. Entrepreneurship and open innovation are the key players here. It hosts the presentations of technological challenges, successful stories, investors rounds and workshops.

Technological challenges

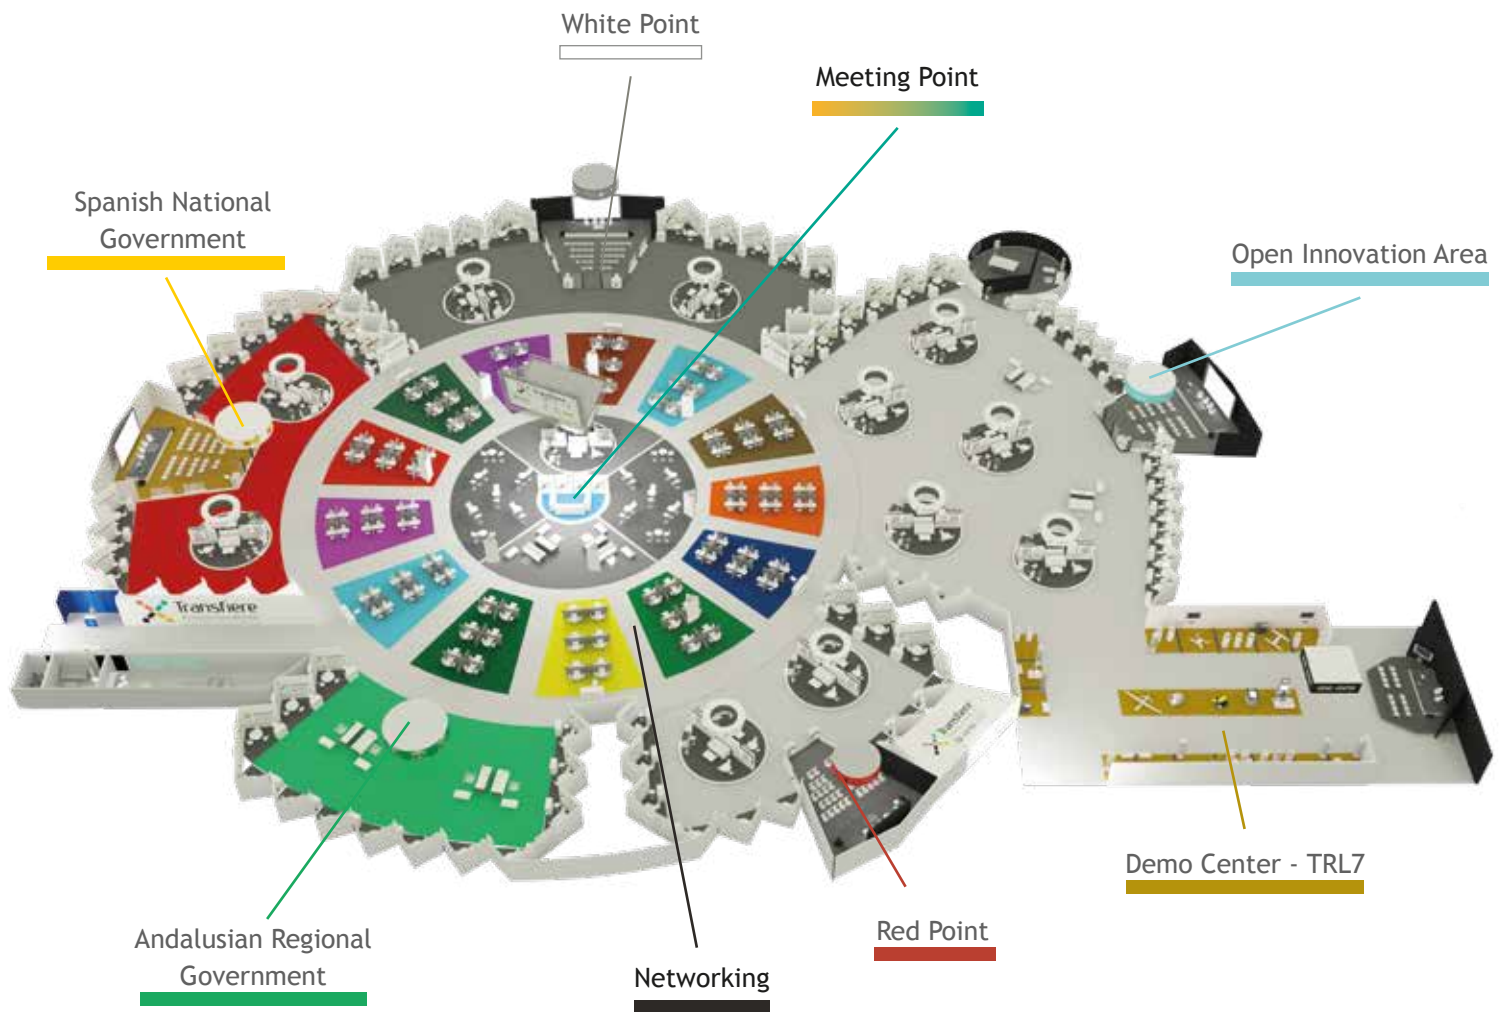

First-class companies find innovative solutions in the Forum to their current technological challenges. They hold private meetings during the event with start-ups companies, spin-offs companies, research groups, investors, technology centers and companies that present solutions to their demands.

How to present a technological challenge?

Floorplan Transfiere 2020
