

ROUND TABLE

THE ISRAELI MODEL FOR TECHNOLOGY TRANSFER AND THE ENTERPRISES CREATION

16:00-17:00h.

Israel has nowadays one of the most vibrant economies of the world, specialized in high tech industry, covering different interesting sectors. Specifically, Israel is a country which invest (4,25% GDP) in investigation and science and technology development above the average of the Organisation for Economic Cooperation and Development (2,7%) and still above countries like United States (3,9%). Israel is a country that is strongly committed to knowledge and technological innovation. Its successful model is based in the creation of an enabling ecosystem that combines the government, private and public entities with acceleration programs and models of access to capital, and where in the world of research and business are specially connected.
